

TAKE OUT MONSTERS

A series in progress by [student's name]

Ever seen something *lurking* out of the corner of your eye? Something that doesn't look quite *alive*?

Ever moved into a house and sensed something *watching you*? Like *you're not alone*?

Ever just wanted those things to *STOP*?

Well, look no further my dears! With our trained experts in everything spooky and scary, we're here to help you with any and all of your monster needs!

Now, there's a strong chance you may be asking yourself right now: "Who are these weirdos?" or "Why is this commercial playing on my TV?" or perhaps even, "Wait, why the hell is my TV unplugged?"

Just take a deep breath and listen, we promise you won't regret it!

Trust us, all this is normal. At least, as normal as it can be... *when you work with monsters!*

But first, a little about our agency: we're a group of maniacs who have been studying monsters for years and finally decided to put our unique talents to use! Our job is to detect, capture, and rehabilitate any monsters you need us to!

We have two types of staff: common and international. Common staff are those stationed in certain areas around the world who will be assigned to you after hearing the problem at hand! Our international staff are the ones willing to fly out to help with any creatures who may come from a specific culture, ones that require extra assistance or knowledge. Those are the few who are chosen directly by you! We'll send a few files for you to choose from and they'll be on a plane in 24 hours!

Glass Garden Headquarters

With the agency circling around the detection, capture, and rehabilitation of ghosts, an open area was necessary for the group. After months of searching, Head Captain Roasie discovered a small glass garden located in *Phoenix, Arizona*.

It was seen as the perfect place, and so it was selected. It has been redesigned multiple times by the agency and has been the main home for rehabilitating ghosts since 2006. While it remains near the public domain, if anyone outside of the agency enters without a warrant, consequences will ensue.

The only people allowed at HQ are staff above level three, those below level three are granted access as long as they have proper supervision.

HUI PHAN INTERNATIONAL

THE EMPATH

Recently hired, Hui Phan is an international agent who specializes in Asian and English creatures. Known as “The Empath” within agency walls, she’s someone who can empathize with anyone or *anything* residing in both the realms of life and death.

Before joining the agency, Hui attended Skidmore University with a major in psychology for two years before dropping out due to personal issues. The young woman lived with two roommates before moving out in late 2016 and started renting an apartment in a bad part of town where she lived for three years. *Alone.*

AKIN SELI
LOCATED

#XXXXXXXXXX

RECENTLY

A young woman who passed away (suspected to be in the 80's due to time frame given by family), recently located by the agency, and more specifically by Agent [REDACTED]. Found with a driver's license, ID'ing the woman was a simple process and the family was located less than one week after the detection.

Born and raised in Michigan, Akin was a good kid with straight A's, a blank record, and never a partier. The possible reason behind her death has been challenged multiple times, theories rising but none have come close to being confirmed.
